NEW WEB DEVELOPMENT 102: BUILD YOUR OWN INTERACTIVE HUB

AGES 9 – 11 YEARS

Every app, game, and website students love has one thing in common, it responds. It reacts to a click, remembers a choice, and changes what you see. In this course, students discover the logic behind that magic for the very first time.

Using **HTML to structure content, CSS to design layouts that look sharp on any screen, and JavaScript to make everything react and respond**, students **build the same foundation that powers careers in web development, UX design, and digital product creation**.

Through hands-on projects, they explore how interactivity works, learn to write real code that makes things happen, and create a fully working, personalised hub they can proudly share. By the end, they will not just use the internet differently, they will see it differently.
